# WHY IV THERAPY?

**IV treatment involves infusing vitamins and minerals directly into the bloodstream, which offers more efficient nutrient absorption than oral supplements. Other profound benefits of IV therapy include:**

- **Immune System Support**
- **Hydration and Detoxification**
- **Recovery from Hangover & Workouts**
- **Energy Boost**
- **Anti-aging**
- **Altitude Sickness Support**

**Refresh and renew yourself with an influx of hydration, vitamins, and nutrients that can boost your health and vitality. Our IV Therapy services are a mix of luxury wellness.**

**The treatment itself typically lasts 30-45 minutes and will be carefully supervised by our experienced nursing staff.**
